

Fabric Cutters

Are your hands strained or tired of manually cutting fabric materials? Are you frustrated with the lack of precision your current scissors provide? Want a quick, easy and affordable way to enhance comfort and precision when cutting through paper or fabric? How about lightweight heavy duty portable electric scissors or heat cutting blade?

ZippyCut

ZippyCut is a sturdy, portable industrial electric scissor that can be used with paper and most fabrics including impregnated and coated fabrics in addition to any large format materials. ZippyCut is designed for comfort, safety and maneuverability with a length of 7-inches and a weight of only 8 ounces. With two interchangeable carbide blades including a guided shoe blade, the ZippyCut is a mobile high precision cutting tool that can cut through intricate designs with ease. In addition, ZippyCut can be used both indoors or outdoors with either rechargeable battery or AC power.

ZippyCut is perfect for use with most large format media including fabric, leather, paper, woven or knitted Kevlar™, Vectran™, Zylon™, Fiberglass™ Spectra™ and other similar engineered materials.

- Unique lightweight industrial electric scissor widely used to cut fabrics
- Ergonomically designed for comfort and maneuverability
- Two interchangeable sharp and precise carbide blades
- Easily cut through paper, fabric, Kevlar™, fiberglass and most large format media
- Complete set including a rechargeable battery, charger and AC/DC adapter

HotSlice Fabric Cutter

A high quality industrial built portable, adjustable hand held fabric heating cutter specifically designed to accurately cut and seal various types of fabrics.

- High quality portable hand held heating cutter for most fabrics
