

Bulk Ink System for Mutoh, Mimaki, Roland

Bottle Type 1

A bottle unit is installed on the top of the printer. And each bottle is connected to each cartridge with ink tubing. This type is the most popular with open ink systems.

(Available in 1 and 2L.)

Ink Pouch Stand Type

An ink pouch stand is installed on top of the printer. And each pouch stand is connected to each cartridge with ink tubing. Available in 1 and 2L configurations.

(Degassed bag compatible)

Bottle Type 2

Compact bottle system easily refillable with a float in the cartridge, for uninterrupted ink supply.

(Available in 650ml and 1.2L. Perfect for machine flushing)

Degassed ink pouch compatible
