

## HORIZONTAL FIXATION

The GoTx<sup>®</sup> 192FX is a powerful fixation unit for pigment inks. Designed to run with the GoTx<sup>®</sup> 4190 printer for seamless productivity.

Utilising quad zone heater element plates below and above the media horizontally where the fabric is not touched during cure. For consistency we do not employ IR heatlamps to avoid cool cure zones across the media. Fixation on a horizontal path provides better control and avoids smoke, steam or oil which can be dragged across the media = ghost free imaging.

- Up to 60 linear meters per hour output, with variable top, bottom radial axial fans for steam removal
- The GoTx<sup>®</sup> fixation modules are designed for uninterrupted production and media is NOT touched during transfer fixation process
- No air scrubber required

## SPECIFICATIONS

192FX [Double width]	
Width x Depth x Height (mm)	2900 x 1400 x 1100 (114" x 55" x 43")
Media size (mm)	900-1900
Elements / Zones	24 / 8
Speed	> 1meter / minute
